

XACT DATA DISCOVERY  
Because you need to know

## *Review It*

As the cornerstone of our expanded arsenal of Data Discovery and Management tools, Xact Data Discovery's in-house Online Review & Case Data Management Tool (XDD-ORT) provides corporations, law firms and government agencies with the most advanced features, capabilities and benefits in the industry.

Enhanced from its original implementation as a Content Management/Analysis Tool, XDD-ORT was created and used for the defense of (7) top Enron executives. Subsequent case experience expanded the evolution of the software application, combining best of breed technologies, features and functionality based upon client specific requirements and expectations.

XDD-ORT provides clients with state of the art combined Search, Analysis, Review, Data and Case Management functionality that sets a new standard for excellence.

### *XDD-ORT Main Features*

#### **Multi-Team Security Levels within Same Case/Data Set**

Allows groups of people working on the same data pool to have their own private material libraries, as well as libraries shared among all or some teams and members.

#### **Powerful Administration and Control Feature Set**

Advanced administrative tools provide complete control over every aspect of the application, enabling users to manage workflow, security, data, feature sets and layout of the tool itself.

## **Collaborative Case Management Features**

Provides multiple collaborative tools including global announcements, team events calendar, online instant messaging, e-Binder sharing and data pool sharing.

## **Auditable Data Security System**

Enables administrators to identify who, what, when and how data in the system has been touched, viewed or edited.

## **Auditable User Security System**

Enables administrative staff to retrace each user's path for every session in real time throughout the case history.

## *XDD-ORT Additional Capabilities*

- Vendor/Contractor Activity Tracking
- Client Controlled Productions
- Extensive Foreign Language Support
- Streamlined Workflow Support
- Extensive/Flexible Reporting
- Manage External Document, Events and Personnel
- Native Branding within Native Export
- e-Binder Organizational Tools
- Advanced Keyword Search Functions
- Offline and Low Bandwidth Review Methodologies
- Bulk First Pass Review
- Automatic Extraction of Involved Entities
- Automatic Extraction of e-Mail Usage Patterns

## **About Us**

*Xact Data Discovery is a national Data Discovery and Management company that provides full-service, closed-loop e-Discovery, Forensics, Hosting, Reprographics and Data Management services to law firms, corporations and government agencies. At Xact Data Discovery, communication is everything—because you need to know.*

## **Contact Us**

*For additional information regarding Xact Data Discovery's XDD-ORT, contact us at 877.545.XACT (9228), [xdd-ort@xactdatadiscovery.com](mailto:xdd-ort@xactdatadiscovery.com) or visit our website online at [www.xactdatadiscovery.com/xdd-ort](http://www.xactdatadiscovery.com/xdd-ort).*

XACT DATA DISCOVERY  
Because you need to know

## *Investigate It*

As an integral part of the overall Data Discovery process, Xact Data Discovery's Forensics Division provides corporations, law firms and government agencies with proven world-class computer Forensic Services expertise to help clients investigate, gather, preserve, analyze and convert electronic data into comprehensible evidence to maximize its value and use in court.

Unique to the industry, Xact Data Discovery's Forensics Division engages a streamlined *Forensic Communication Process* throughout all project pre-collection, collection and post-collection phases.

In addition to industry standard investigative techniques, Xact Data Discovery Forensic Services include the following disciplines—each crucial to the success of any case.

- Forensic Investigations
- Data Imaging (vs. copy/print)
- Interviews
- Physical Security Assessments
- Electronic Security Assessments
- Expert Testimony
- Network Audits
- Computer User Profiling
- Link Analysis
- Exhibit Production

### **High-Level Certifications**

Xact Data Discovery (XDD) forensic experts are certified by US Courts, FLETC, AFOSI, SANS Institute and many other prestigious agencies.

### **Investigative Approach**

XDD applies a complete “investigative” forensic approach versus only standard “clinical” electronic data analysis.

### **Extensive Experience**

XDD forensic experts have amassed extensive experience working 1,000+ government/private company cases in the past (5) years.

### **Data Imaging**

XDD Forensic Services recover files via imaging versus only copying/printing providing more accurate, useful and updated verification of data.

### **High-Profile SEC Case Experience**

XDD forensic experts have worked on multiple high-profile SEC engagements in the past 10+ years.

### **DOJ Standards**

XDD adheres to all DOJ standards at the collection stage.

### **Trusted Advisor**

XDD forensic experts provide training to SEC, USSS, DOD and US Treasury investigators as a trusted mentor and advisor.

XACT DATA DISCOVERY  
Because you need to know

## *Discover It*

As an integral part of our closed-loop Data Discovery and Management Tool service mix, Xact Data Discovery's Advanced Search Tool (XDD-AST) provides corporations, law firms, and government agencies with the most advanced search features, capabilities and benefits available in today's marketplace. XDD-AST enables clients to search large data sets via a unique blend of Keyword *and* Conceptual Search logic working in tandem to acquire highly relevant data.

Working in parallel with its powerful Keyword Search logic, XDD-AST's Conceptual Search Intelligence analyzes the actual "context" of what was said and how the information was communicated or implied within a document itself—rather than locating only the "content" or "keyword" used within it—providing the highest possible rate of relevant search results indexed and illustrated side by side by relevancy, accuracy and frequency.

### *XDD-AST Main Features*

#### **Prevention of Inadvertent Disclosure of Privileged Information**

Increases users' ability to locate privileged information by searching not only for specific words used, but by the *ideas expressed within them*.

#### **Multi-Lingual and Cross-Lingual Text Analysis**

Eliminates any language limitations associated to analyzed data sets. Analysis, searching, categorization and taxonomy generation are all cross-lingual, requiring no translation. Searches conducted in English return conversational similarities in multiple foreign languages including; Japanese, Korean, Chinese, Vietnamese, Arabic, French, Spanish, German, etc.

## Contextual Meaning

Identifies alternate meanings or intentions based upon the context in which words or phrases are used.

## Automatic Summation

Selects and displays “hit results” for the most relevant sentence within a document based upon the analysis of the topic addressed—negating the typical methodology of viewing only the first sentence in a document return list.

## Automatic Categorization

Enables users to see a “first pass review” automatically by identifying and categorizing documents that appear to address similar topics.

## XDD-AST Additional Capabilities

- Automatic Taxonomy Generation
- Manual Categorization
- Minimized Obfuscation
- Addresses Synonymy and Polysemy
- Sentiment Determination
- Relationship Discovery
- Domain Agnostic Analysis
